# CHOOSE A MOUNT TYPE

## **INSIDE MOUNT**

- Mounted inside your window's frame
- Provides a clean, built-in look
- Leaves attractive woodwork exposed
- 3/4" minimum depth is required to
- do an inside mount

### STEP 1: MEASURE THE WIDTH

Measure the width at the top inside the window frame. This is your ordering width. We will take a small deduction (approx. 1/8") so the shade fits in properly.

#### STEP 2: MEASURE THE LENGTH

Finding the length is a similar process measure.

The length of the window in 3 places on the window: left, center and right. Round all measurements up to nearest 1/8". The largest of the 3 measurements is yout ordering length

| WIDTH  | RECORD MEASUREMENT<br>(1/8" INTERVAL) |
|--------|---------------------------------------|
| A: TOP |                                       |

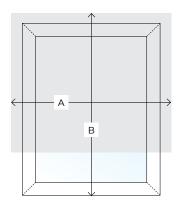

| LENGTH    | RECORD MEASUREMENT<br>(1/8" INTERVAL) |
|-----------|---------------------------------------|
| B: LEFT   |                                       |
| C: CENTER |                                       |
| D: RIGHT  |                                       |

\*Largest of the 3 length measurements is your ordering length.

#### STEP 3: MEASURE THE DEPTH

Measure the depth at the top of the inside window casing. We want to ensure you have enough depth to securely do an inside mount, as well as understand if you're interested in a flush mount (where the product does not protrude from the window frame). The depth of the product varies based on control type and options.

### OUTSIDE MOUNT

- Mounted outside or on top of the window's frame
- Provides a taller, more dramatic appearance
- There is no minimum depth requirement

#### STEP 1: MEASURE THE WIDTH

Measure the width of the area you wish to cover. If space allows we recommend adding 2-3" (1 - 1 1/2" each side) to this measurement to help eliminate light see page. This is your ordering width and will be the overall measurement of the shade.

| WIDTH                         | RECORD MEASUREMENT<br>(1/8" INTERVAL) |
|-------------------------------|---------------------------------------|
| A: TOTAL<br>WIDTH TO<br>COVER |                                       |

\*This is your ordering width.

#### STEP 2: MEASURE THE LENGTH

Measure the height of the area you wish to cover. This is your ordering length.

| LENGTH                                | RECORD MEASUREMENT<br>(1/8" INTERVAL) |
|---------------------------------------|---------------------------------------|
| <b>B:</b> TOTAL<br>HEIGHT TO<br>COVER |                                       |

\*This is your ordering length.
